CAREER OBJECTIVE:

An enthusiastic and goal-oriented professional seeking a challenging role as a Data Analyst in an organization where I can utilize and enhance my skills and knowledge, also contribute to organization's goals and objectives.

TECHNICAL EXPERIENCE:

❖ **COMPANY** : Excelr Solution

❖ **ROLE** : Data Analyst

❖ **Roles and Responsibilities :**

- Data Mining- Data Analysts extract data from multiple sources that can be primary or secondary.
- I helped in designing and maintain the database systems. This includes creating, updating, reading, and deleting a database.
- Data collected from multiple sources would always have errors, redundancy, missing values, and many more, which means that the data is in a raw format.
- I make sure that the data collected from multiple sources is relevant to the business. Also prepare reports that represent crucial information.
- These reports consist of graphs and charts to represent factors associated with the business.
- I also helped in troubleshoot issues related to information, reports, and databases.

Skills:

- ❖ **SQL** - Knowledge of different type of database languages like DDL, DML, DCL, TCL. Have good understanding of different types of SQL joins. Aggregate functions and Clauses in SQL . Constraints, Stored procedure.
- ❖ **Tableau** - Developing, Designing and supporting interactive Tableau Dashboards. Created Different Dashboard Actions at worksheet level and dashboard level. Filter, parameter, set, group, calculated field.
Knowledge about Data Joining and Data Blending in Tableau.
- ❖ Basic Knowledge of Python
- ❖ **Advance Excel** -Pivot Table, VLOOKUP, Charts, Data Validation, Excel Formulas, Creating Dashboard and visualizing for presentation.

EDUCATIONAL PROFILE:
